

TAILOR MADE TRACE ELEMENT MIXTURES

**Iron Hydroxide +
Trace elements**

Pack size: 5 - 20 kg Fermentable bag

MethaTec® Essentials

- Solid trace element mixture using Iron Hydroxide as a buffer
- Individual and exactly balanced to the needs of the micronutrient requirements of the biogas system
- Ideal for systems with high amounts of sulphur
- The included Iron Hydroxide binds the sulphide and prevents the conversion to H₂S
- Maximum availability due to chelated micronutrients
- Cost effective and sustainably effective

**Iron Hydroxide +
Trace Elements + Enzymes**

Pack size: 5 - 20 kg Fermentable bag

MethaTec® Trace n´ Zyme

**Perfectly mixed combinations of micronutrients,
Iron Hydroxide and enzymes for your biogas system**

- Reliable top performance thanks to our highly efficient combination of trace elements and
- Ideal for biogas systems with high amounts of sulphur and high fibre substrates
- Iron Hydroxide, trace elements and enzymes in one product
